

A high speed broadband voice and data solution capable of download speeds up to 6 Mbps. This service includes 2 to 5 phone lines. A DHCP server is also included with four ethernet 10BaseT access points.

As one of the fastest growing telecommunications providers, Datavo offers complete data and voice solutions for small and medium-sized businesses. Our customized packages were designed to deliver the high level of services previously available only to big businesses with a complex phone system.

We own and operate our network, equipment, and switching facilities, which eliminates the high cost often associated with resold network and services.

No Risk, Guaranteed. We're confident in our service offerings. Datavo offers a 60-day no hassle guarantee. If you're not satisfied with our services within the first 60 days starting from installation of service, we will gladly release you from any contractual agreement with no questions asked.

Seamless Conversion. You will keep all the same phone numbers and features you have today. The only changes you will notice are the lower cost, higher Internet speed, and better overall service.

Affordable Pricing. You pay one affordable price for all the voice and data services you need - all on one easy to understand bill, one number to call for answers.

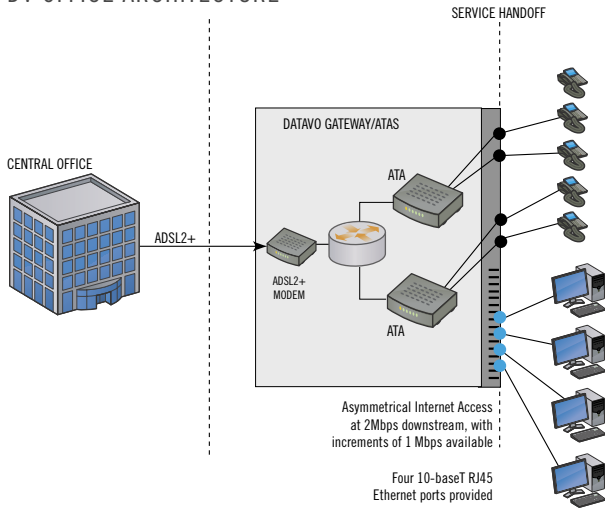

“Datavo was able to offer us the best overall solution for our store and website. They were able to provide us with our phone lines, unlimited local, long distance and high speed Internet access, all on one easy to read invoice.”

- Over 50,000 active phone lines.
- Serving over 170 central offices throughout California.
- Full array of voice and data services delivered on it's own network facilities and equipment.
- Unparallel customer service.

DV OFFICE ARCHITECTURE

DV OFFICE

Our service is delivered over the latest state-of-the-art technology platform. Our broadband data services are deployed using ADSL2+, raising the bar on achievable speed with respect to distance.

Our voice services are provided over a dedicated access network - not over the Internet. As a result, calls are safe from potential tampering. Additionally, calls are not subject to the impairment normally associated with simultaneous data transmission, allowing all lines to be used for voice, fax or data.

To further ensure reliability, DV Office includes one "Life Line" which is not subject to failure when the power supply fails or is turned off.

Datavo maintains a dedicated network connecting to 911 centers in all geographical locations in which it provides services. As a result, DV Office customers have access to 911 services at all times.

DV Office plans include unlimited local calling, long distance minutes, on-net calls, and the options to purchase voice mail, toll free numbers and additional long distance minutes, if needed.

Included In Your DV Office Package

Voice & Data	All packages include 2 to 5 voice lines and high speed internet access.
High Speed DSL	DSL downstream speed of 2 Mbps and up to 10 Mbps depending on your location.
Local Calling	Unlimited local calling included in all DV Office plans.
On-Net Calls	Calls made to other Datavo customers are free.
Long Distance Minutes	100 minutes/line/month included in plans.
Features	Includes all existing features on your lines at the time of conversion.

Options: You may add voice mail, toll-free number, unlimited long distance calling and other feature at additional monthly charges, if necessary.

Once you experienced Datavo, you will realize that it is the only company you need for your telecommunications needs. Speak with one of our sales professionals to discuss how our flexible voice and data plans can help you reduce the cost of running your business while achieving higher efficiency.
